Recap of Key Points to Date

SB 233 asks the MLRC to “contract with the Council of State Governments to continue its review of Michigan’s sentencing guidelines and practices, including . . . studying length of prison stay and parole board discretion.”

1. **Sentencing Guidelines**
 - Unusual in complexity and indeterminacy
 - 15 years of use, largely unstudied
2. **Population Pressure**
 - Parole approval rate drives prison population
 - Felons typically & increasingly sentenced to do time, most often in jail
3. **Disparity & Disconnection**
 - Disparity in dispositions by geography and within a single grid cell
 - Jail/probation sentencing is not well connected with goal of public safety

Reframing to Define Goals of “Justice”

Overview of Presentation

Punishing Predictably & Proportionally

Holding Offenders Accountable

Reducing Criminal Behavior

Overview of Presentation

Punishing Predictably & Proportionally

- Good Intentions but Guidelines Allow Disparity
- Evidence of Unpredictable and Disparate Sentencing
- Impact on Prison and Jail Populations

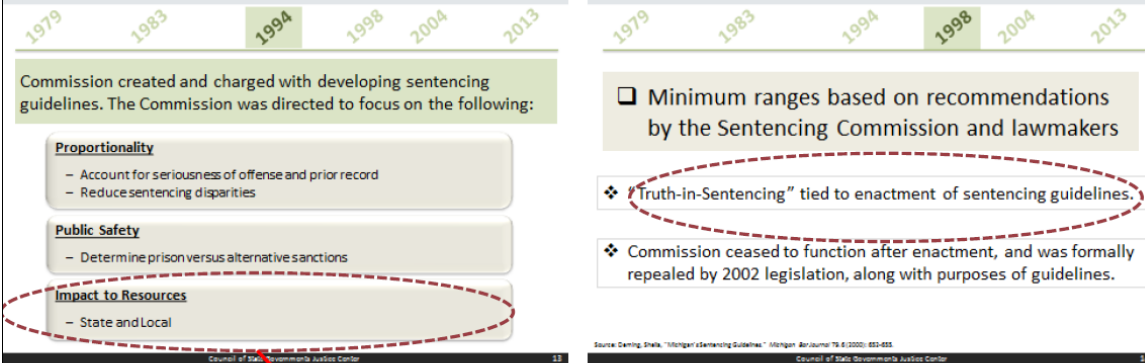

Holding Offenders Accountable

Reducing Criminal Behavior

Guidelines Have Been Effective at Limiting Admissions to Prison, and Imposing Truth in Sentencing for Prison Sentences

Legislature Moves Towards Adoption of Sentencing Guidelines
By Passing HB 4782 (1994 PA 445)

Legislature Adopts Sentencing Guidelines – 1998 PA 317

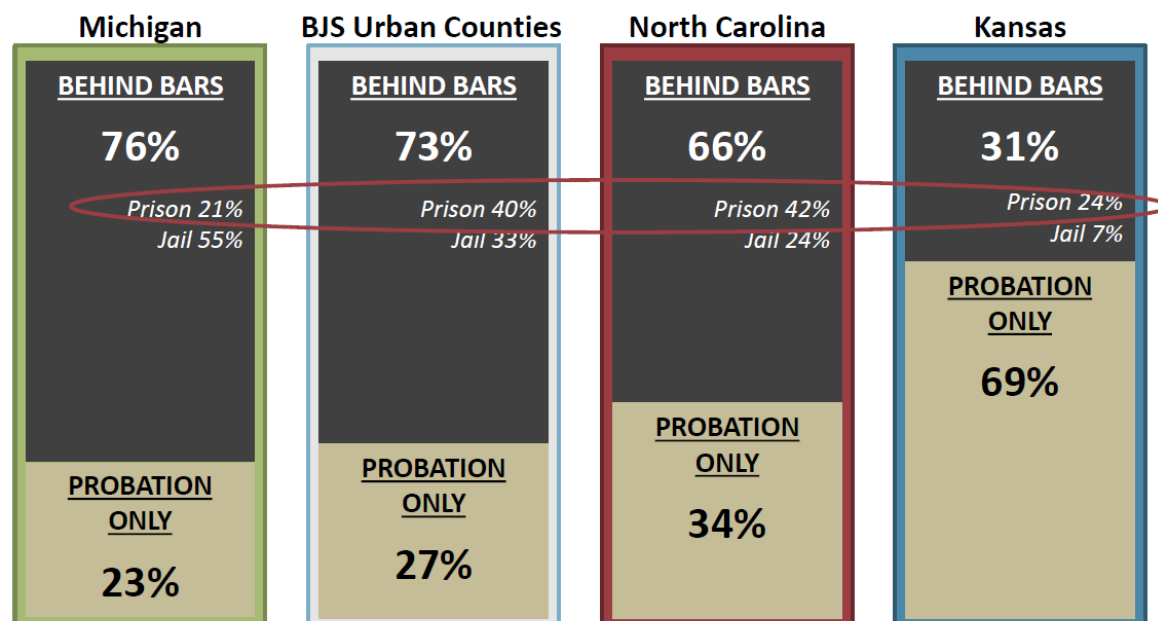

(2) In developing recommended sentencing guidelines, the commission shall consider the likelihood that the capacity of state and local correctional facilities will be exceeded. The commission shall submit to the legislature a prison impact report relating to any sentencing guidelines submitted under this section. The report shall include the projected impact on total capacity of state correctional facilities.

Council of State Governments Justice Center

9

Original Sentencing Commission Statute Emphasized Proportionality and Reduction of Disparity (1994 PA 445) . . .

1979 1983 1994 1998 2004 2013

Commission created and charged with developing sentencing guidelines. The Commission was directed to focus on the following:

Proportionality

- Account for seriousness of offense and prior record
- Reduce sentencing disparities

- (i) Provide for protection of the public.
- (ii) An offense involving violence against a person shall be considered more severe than other offenses.
- (iii) Be proportionate to the seriousness of the offense and the offender's prior criminal record.
- (iv) Reduce sentencing disparities based on factors other than offense characteristics and offender characteristics and ensure that offenders with similar offense and offender characteristics receive substantially similar sentences.
- (v) Specify the circumstances under which a term of imprisonment is proper and the circumstances under which intermediate sanctions are proper.

Council of State Governments Justice Center

10

But the Sentencing System Builds In Multiple Sources of Enormous Potential Disparity

Grid Cells

- ❖ Only 1 of 3 cell types (*Prison*, *Straddle*, *Intermediate*) in the Guidelines results in predictable sentencing – to Prison

Prison Sentencing

- ❖ Upper end of minimum range (Min-Max) typically 2-4 times longer than lower end (Min-Min), and habitual laws expand to 5-8 times longer, as well as expand statutory maximum

Time Served in Prison

- ❖ Parole discretion controls ultimate length of stay up to Statutory Maximum, which may be 3-4 times longer than sentenced minimum

Grid Cells: 89% of Cases Fall in Cells with Unpredictable Sentencing Dispositions

Intermediate (62% of Cases)

Allowable punishments:

- ☐ Up to 1 year in jail plus probation
- ☐ Jail only (1 year max)
- ☐ Probation only (5 year max)
- ☐ Fees/fines only

Straddle (27% of Cases)

Allowable punishments:

- ☐ Prison
- ☐ Up to 1 year in jail plus probation
- ☐ Jail only (1 year max)
- ☐ Probation only (5 year max)
- ☐ Fees/fines only

Sentencing Grid for Class F Offenses—MCL 777.67
Includes Ranges Calculated for Habitual Offenders (MCL 777.21(3)(a)–(c))

OV Level	PRV Level						Offender Status
	A 0 Points	B 1-9 Points	C 10-24 Points	D 25-49 Points	E 50-74 Points	F 75+ Points	
I 0-9 Points	3*	6*	9*	12*	23	23	
	3*	7*	11*	21	28	28	HO2
	4*	9*	13*	25	34	34	HO3
	6*	12*	18*	34	46	46	HO4
II 10-34 Points	6*	9*	13*	23	23	24	
	7*	11*	21	28	28	30	HO2
	9*	13*	25	34	34	36	HO3
	12*	18*	34	46	46	48	HO4
III 35-74 Points	9*	13*	23	23	24	29	
	11*	21	21	28	30	36	HO2
	13*	25	25	34	36	43	HO3

Council of State Governments Justice Center

18

Length of Minimum Prison Sentences Has Increased by Almost Three Months

Length of Minimum Prison Sentence Imposed

Cost Impact of the Increase

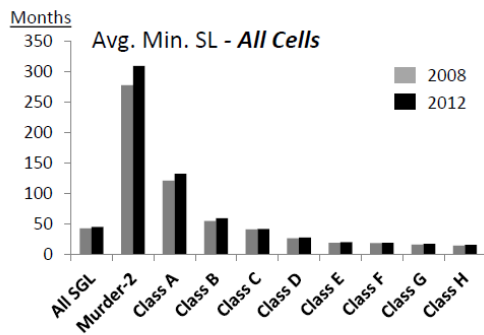

- ❖ The 8,881 individuals sentenced to prison in 2012 will serve on average at least 2.7 months longer compared to the 2008 average.
- ❖ Translates to an additional 1,971 prison beds occupied on any given day.
- ❖ At \$98 per day, cost to Michigan is an additional \$70 million each year.

Source: Felony Sentencing (BIR) Data 2008-2012, Michigan Dept. of Corrections; Corrections Background Briefing, December 2012, House Fiscal Agency.

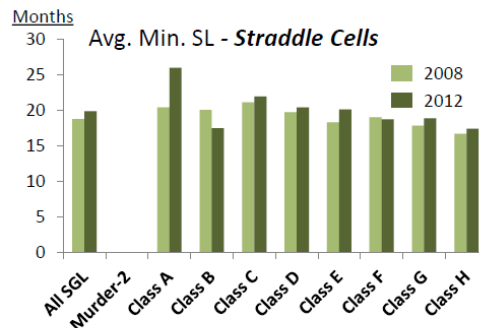

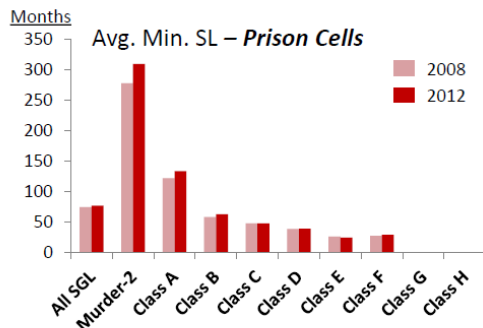

Possible Causes of Increased Minimum Sentences

Possible Cause	Assessment	Details
More serious offenses?	No	Grid placement is constant
More consecutive sentencing?	No	Consistent over time
More habitual sentencing?	A little	Increased use, increased minimums
Higher PRV/OV Scores?	No	Only two classes had scoring changes leading to longer minimums
Use of Discretion?	Yes	Everything points to changes in practice within discretion allowed

Average Minimum Sentences Have Increased Across Offense Classes and Cell Types

Increases in sentence lengths occur across all grids and apply to all cell types except Class B Straddle Cells

Source: Felony Sentencing (BIR) Data 2008-2012, Michigan Dept. of Corrections.

Council of State Governments Justice Center

21

Cases Are not Migrating to More Serious Offense Classes

Distribution of Guidelines Prison Sentences by Class

Grid	2008	2012
2nd Deg. Mur.	2%	2%
Class A	11%	11%
Class B	12%	11%
Class C	13%	14%
Class D	18%	16%
Class E	27%	27%
Class F	7%	7%
Class G	9%	10%
Class H	1%	1%
Total Cases	9,411	8,851

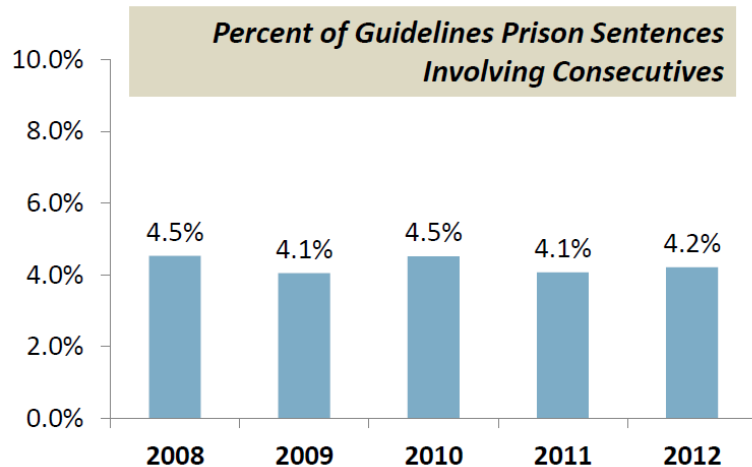

Increase in overall average minimum sentence length is not due to cases moving from less to more serious offense classes

Summary – Punishing Predictably & Proportionally: Unpredictable and Disparate Sentencing

Key Findings	Further Research
<ul style="list-style-type: none">❑ Opportunities for disparity built in<ul style="list-style-type: none">✓ Most sentences fall in grid cells with unpredictable outcomes✓ Minimum ranges span 100-300%❑ Actual disparity emerges<ul style="list-style-type: none">✓ Minimums span the full 100-300% range✓ Disparate outcomes in straddle cell sentencing✓ Great variation by county in sentencing❑ Prison sentence length increasing<ul style="list-style-type: none">✓ Primary cause is the exercise of discretion to ratchet up sentencing	<ul style="list-style-type: none">➤ Patterns and factors in parole decision making<ul style="list-style-type: none">– Does parole add to or smooth out disparity?– Length of stay based on parole decisions– Parole decisions by risk level

Overview of Presentation

Punishing Predictably & Proportionally

Holding Offenders Accountable

- Who Is Supervised
- Response to Supervision Violations
- Victim Perspectives

Reducing Criminal Behavior

Guidelines Do Not Effectively Structure Supervision

Who Gets Supervision

- ❖ Too many high-risk felons unsupervised after release from jail

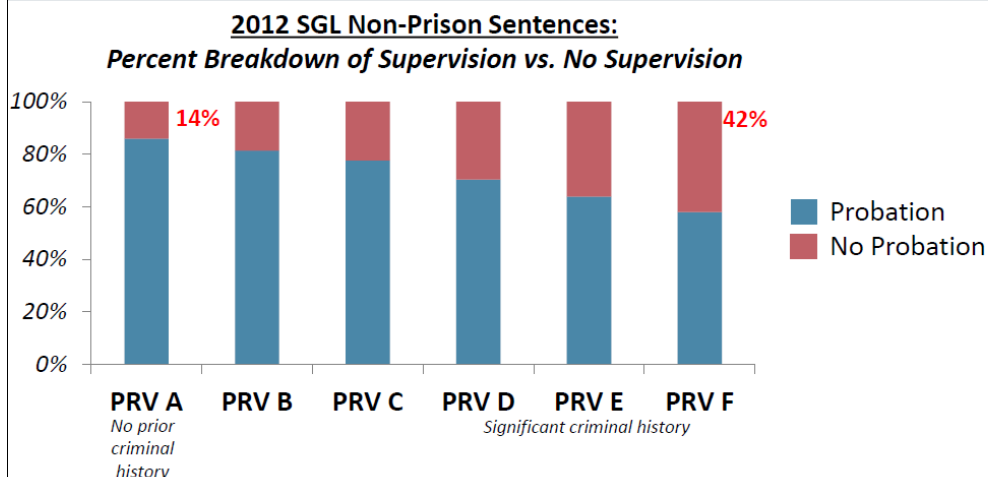

Length of Supervision

- ❖ Low-risk probationers supervised almost as long as high-risk
- ❖ Sentencing law forces choice between incapacitation and post-prison supervision

Responses to Violations

- ❖ Violation responses never written into guidelines
- ❖ Voluntary deployment of Swift and Sure

Repeat Offenders Three Times Less Likely to Be Supervised After Release from Jail

For non-prison sentences, as the degree of risk increases, the probability of being supervised decreases.

More than 4,000 Higher Risk Felons Sentenced to Jail Without Post-Release Supervision

2012 SGL Sentences by Prior Record Level

PRV Level	No prior criminal history			Significant criminal history		
	A	B	C	D	E	F
Total Sentences	7,985	6,110	10,904	9,360	5,302	4,388
Jail Only	978	1,017	2,078	2,080	1,136	849

These felons are higher recidivism risk by virtue of their criminal history (PRV) scores.

4,065 offenders with significant criminal history received sentences that involved no supervision at all (only received a period of time in jail).

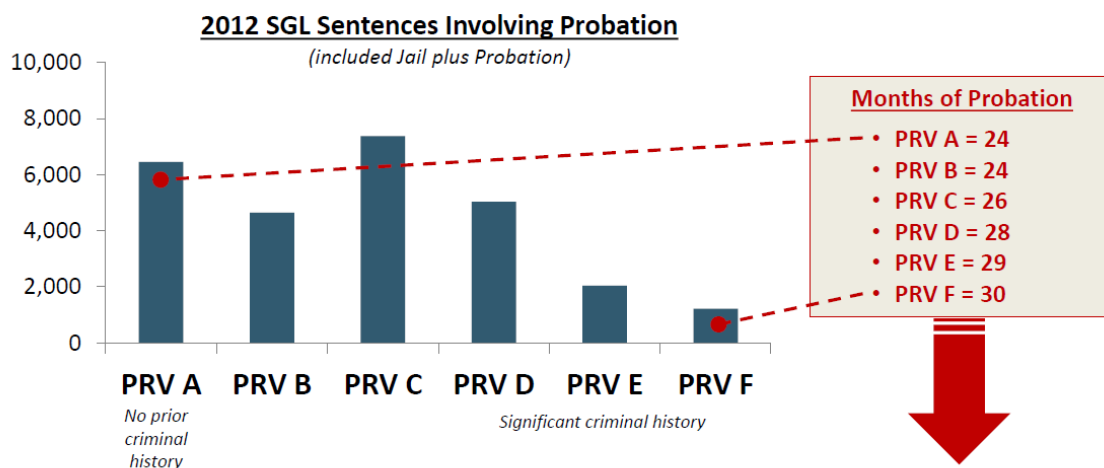

- Represents 21% of total cases involving offenders with significant criminal history

Source: Felony Sentencing (BIR) Data 2008-2012, Michigan Dept. of Corrections.

Council of State Governments Justice Center

31

Low-Risk Probationers Supervised Almost As Long as High-Risk Probationers

Source: Felony Sentencing (BIR) Data 2008-2012, Michigan Dept. of Corrections.

Council of State Governments Justice Center

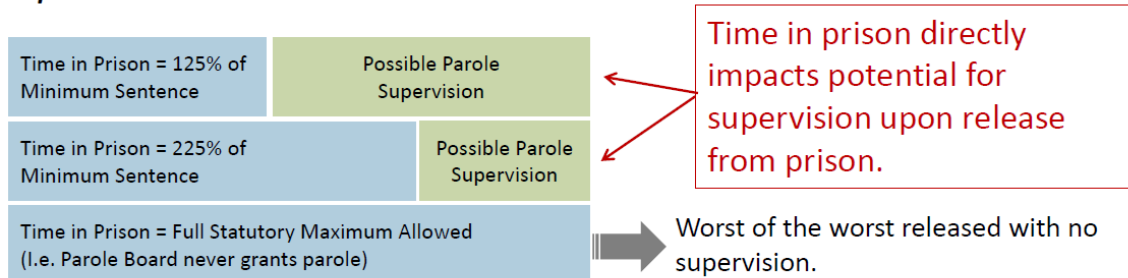

32

Michigan Law Forces a Trade-Off Between Incapacitation and Post-Release Supervision

Many sentencing guideline schemes have a predictable period of post-release supervision.

But under Michigan law, with parole release discretion overlaid on the guidelines, the effect is that as release from prison is delayed, the potential for post-release supervision is reduced.

Guidelines Were Silent on Probation Revocation and Court Ruling Filled the Void

❖ **Validity** - separation of powers & jury trial

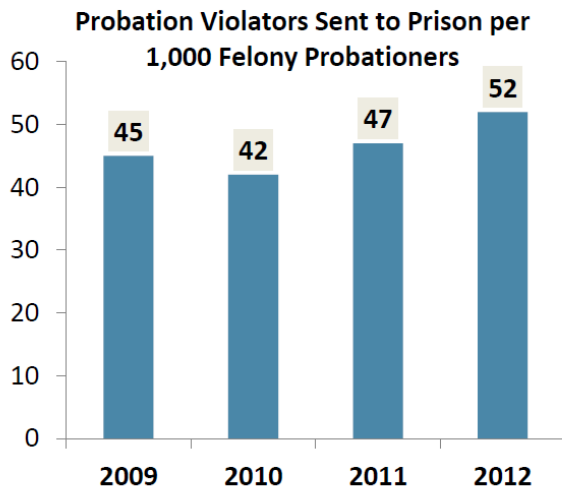

❖ **Applicability** - to probation revocation

"The legislative sentencing guidelines apply to sentences imposed after probation revocation. . . . Further, a defendant's conduct while on probation can be considered as a substantial and compelling reason for departure from the legislative sentencing guidelines."

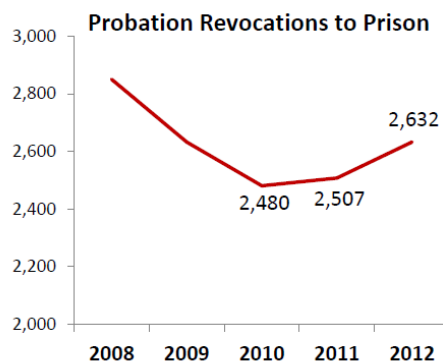

People v. Hendrick (2005)

Increasing Rate of Probation Failure Driving Increase in Admissions to Prison

Probation revocation rate increased almost 24% from 2010 to 2012.

Number of probation revocations to prison increased 6% from 2010 to 2012.

Source: 2006-2011 Statistical Reports, MI Dept. of Corrections; 2008-2012 Intake Profiles, MI Dept. of Corrections; Trends in Key Indicators, MI Dept. of Corrections, February 2013.

Grid Severity Has Minimal Effect on the Length of Revocation Sentence for Probation Compliance Violators

2012 Guidelines Probation Compliance Violator Cases

Grid	#	% of Total
2nd Deg. Mur.	1	0.0%

Council of State Governments Justice Center

37

Use of Jail as Response to Compliance Violations Is Critical in Reducing Both Violations and New Crime

- Prior slides illustrate what we know about the “final” sanctioning of probation violators.
- Reality is that “final” sanctioning is likely preceded by many compliance violations.
- Question becomes not how probation violators are ultimately sentenced, **but when and how sanctions are used to respond to initial patterns of non-compliance.**

Research Shows Effect of Swift and Certain Responses to Reduce Recidivism

Georgia POM

Enabling probation officers to employ administrative sanctions & probationers to waive violation hearings **reduced jail time three-fold**, reduced time spent in court, and increased swiftness of responses to violations.

Hawaii HOPE

Intensive, random drug testing with swift, certain, and brief jail sanctions.

Source: An Evaluation of Georgia's Probation Options Management Act, Applied Research Services, October 2007; Managing Drug Involved Probationers with Swift and Certain Sanctions: Evaluating Hawaii's HOPE, Hawken, Angela and Mark Kleiman, December 2009.

Council of State Governments Justice Center

39

Michigan Has Enacted the Swift and Sure Sanctions Act (2012 PA 616)

Probationers subject to close monitoring and prompt arrest with immediate sanctions following a violation

Funds (\$6m for 2013) available: for assessments; drug-testing; substance abuse/mental health treatment; EM tether devices; contractual employees; law enforcement overtime; jail reimbursement.

But...

Voluntary - i.e., if local circuit court does not want it, this proven concept is not in place

Bottom Line: Until use of swift/certain sanctions becomes the norm, there will be limited accountability for probationers.

Council of State Governments Justice Center

40

Victim Advocates Raise Concerns

Restitution

Restitution must be ordered if crime causes harm to property or injury to victim

Is restitution assessed at the correct amount in appropriate cases?

What are restitution collection rates in Michigan?

Sentencing

Three offense variables address degree of injury to victim or victim's family

Advocates indicate that interpretations of trauma are painful and inadequate

Is there a more direct way to incorporate injury to the victim in sentencing process?

Crime

Crime and arrests down since 2008, but violent crime and low clearance rates continue to plague specific areas

Victim service providers and advocates still see a high need for their services and programs

Are there enough resources for local law enforcement and victim services?

Michigan Is Firm on Restitution in the Constitution and Crime Victim's Rights Act

Constitution 1963, art. 1, § 24 and William Van Regenmorter Crime Victim's Rights Act (CVRA)

- Judge **must** order restitution equal to the victim's loss if the crime causes harm to property or physical or psychological injury.
- Restitution is to be imposed regardless of ability to pay.
- Payments are required across probation, prison and parole.

Collaboration to improve restitution collection is ongoing, across agencies and branches of government.

"Offender compliance with restitution and support orders is a key measure of offender accountability and the performance of offender supervision agencies."

Scoring Victim Injury Requires Assigning Subjective Point Values

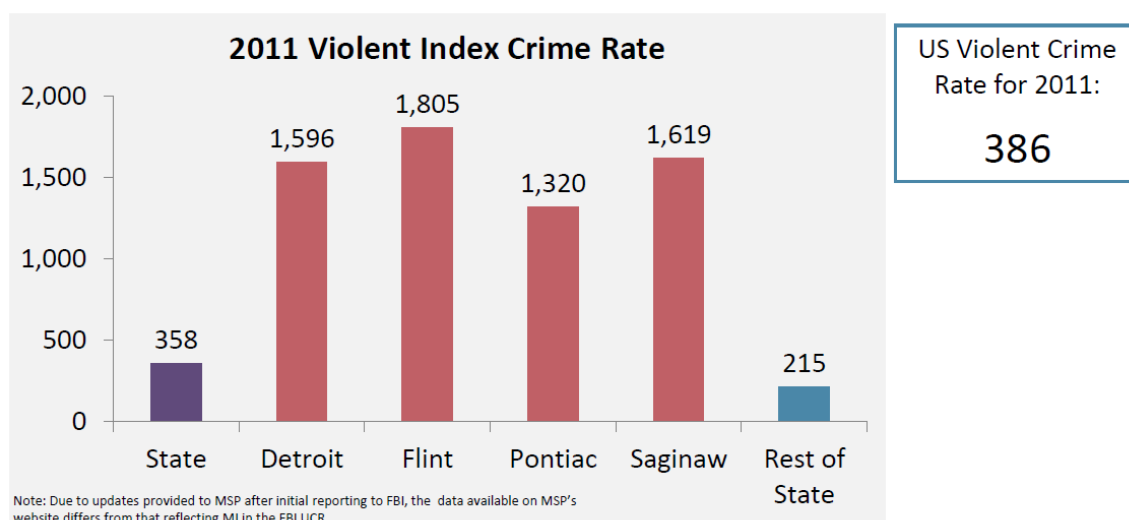

- ☐ **Offense Variable 3:** Physical Injury to a Victim
 - Score 0, 5, 10, 25, 50, or 100 points
- ☐ **Offense Variable 4:** Psychological Injury to a Victim
 - Score 0 or 10 points
- ☐ **Offense Variable 5:** Psychological Injury to Victim's Family
 - Score 0 or 15

Victim advocates indicate that subjective, 'point value' interpretations of injury or trauma are painful and inadequate

Is there a more empowering way to incorporate injury to victims in the sentencing score and process?

High Levels of Reported Violent Crime in Detroit, Flint, Pontiac, and Saginaw

Low Violent Crime Clearance Rates in Detroit, Flint, Pontiac, and Saginaw

Clearance Rate: the percent of reported crimes “cleared” by an arrest.

2011 Violent Index Crime Clearance Rates

Location	Reported Crimes	Reported Arrests	Clearance Rate
Michigan	39,247	12,520	32%
Detroit	14,153	2,809	20%
Flint	2,140	206	10%
Pontiac	889	226	25%
Saginaw	945	235	25%
Rest of State	21,120	9,044	43%
US	1,203,564	534,704	44%

Note: Due to updates provided to MSP after initial reporting to FBI, the data available on MSP's website differs from that reflecting MI in the FBI UCR.

Clearance rates in the “Top Four” are much lower than in the rest of Michigan.

Clearance rates in the rest of Michigan are in line with the rest of the nation.

Source: Michigan State Police; <http://www.micrstats.state.mi.us/MICR/Reports/Report01.aspx> for Michigan breakdowns by city; and FBI, Uniform Crime Report for US average.
