<u>TRANS. NO.</u>	<u>AGENCY</u>	<u>SUBJECT</u>
24-51	Department of Environment, Great Lakes, and Energy- Materials Management Division	Hazardous Waste Management

FISCAL IMPACT: The proposed rule revisions would have little to no anticipated fiscal impact. They are primarily enhancements to existing rules or additional management options. Less waste may be classified as hazardous, potentially reducing state revenue from hazardous waste handler fees. Conversely, restrictions on hazardous waste pharmaceutical handling may increase handler fee revenues. The net result is that these would likely to offset and result in minimal changes to revenues. Implementation of these rule revisions is not expected to exceed current appropriations.
