

Banning flavors is a political ideology, not a scientific one.

78% of youth do not vape for flavors. 90% of adults use flavors to quit smoking and multiple studies show they are significantly more effective for smoking cessation than tobacco flavor, which is a flavor itself.

Banning flavors does not eliminate them. It eliminates hundreds of small Michigan businesses owned by ex-smokers focused on saving lives through harm reduction and solid science. The tax revenue these business generate will simply go out of state and to black market dealers that WILL sell to children, unlike Michigan vape shops.

Michigan regulatory agencies are not supposed to be in the business of creating law and eliminating Michigan businesses, but that is what this ban does. Bypassing the Michigan legislature is over reaching, unconstitutional and NOT representative government.

Banning flavors is a political ideology, not a scientific one.

78% of youth do not vape for flavors. 90% of adults use flavors to quit smoking and multiple studies show they are significantly more effective for smoking cessation than tobacco flavor, which is a flavor itself.

Banning flavors does not eliminate them. It eliminates hundreds of small Michigan businesses owned by ex-smokers focused on saving lives through harm reduction and solid science. The tax revenue these business generate will simply go out of state and to black market dealers that WILL sell to children, unlike Michigan vape shops.

Michigan regulatory agencies are not supposed to be in the business of creating law and eliminating Michigan businesses, but that is what this ban does. Bypassing the Michigan legislature is over reaching, unconstitutional and NOT representative government.

*The flavors have helped me stop smoking, plus they smell better.

Banning flavors is a political ideology, not a scientific one.

78% of youth do not vape for flavors. 90% of adults use flavors to quit smoking and multiple studies show they are significantly more effective for smoking cessation than tobacco flavor, which is a flavor itself.

Banning flavors does not eliminate them. It eliminates hundreds of small Michigan businesses owned by ex-smokers focused on saving lives through harm reduction and solid science. The tax revenue these business generate will simply go out of state and to black market dealers that WILL sell to children, unlike Michigan vape shops.

Michigan regulatory agencies are not supposed to be in the business of creating law and eliminating Michigan businesses, but that is what this ban does. Bypassing the Michigan legislature is over reaching, unconstitutional and NOT representative government.

Banning flavors is a political ideology, not a scientific one.

78% of youth do not vape for flavors. 90% of adults use flavors to quit smoking and multiple studies show they are significantly more effective for smoking cessation than tobacco flavor, which is a flavor itself.

Banning flavors does not eliminate them. It eliminates hundreds of small Michigan businesses owned by ex-smokers focused on saving lives through harm reduction and solid science. The tax revenue these business generate will simply go out of state and to black market dealers that WILL sell to children, unlike Michigan vape shops.

Michigan regulatory agencies are not supposed to be in the business of creating law and eliminating Michigan businesses, but that is what this ban does. Bypassing the Michigan legislature is over reaching, unconstitutional and NOT representative government.

Banning flavors is a political ideology, not a scientific one.

78% of youth do not vape for flavors. 90% of adults use flavors to quit smoking and multiple studies ^{DEC} show they are significantly more effective for ²⁰²⁰ smoking cessation than tobacco flavor, which is a flavor itself.

Banning flavors does not eliminate them. It eliminates hundreds of small Michigan businesses owned by ex-smokers focused on saving lives through harm reduction and solid science. The tax revenue these business generate will simply go out of state and to black market dealers that WILL sell to children, unlike Michigan vape shops.

Michigan regulatory agencies are not supposed to be in the business of creating law and eliminating Michigan businesses, but that is what this ban does. Bypassing the Michigan legislature is over reaching, unconstitutional and NOT representative government.
