4. Describe the general purpose of these rules, including any problem(s) the changes are intended to address:

In order for Michigan to maintain jurisdiction over gas pipeline facilities and transportation, the state must certify that it has adopted each applicable federal standard, or is taking steps to adopt that standard, 49 USC 60105(b)(2). Failure to adopt the updates to the federal standards will eventually lead to reduction or termination of federal funding to the state to carry out enforcement of these standards. In addition, failure to maintain local jurisdiction over pipeline regulation will mean that pipelines located in Michigan will be forced to submit to federal regulators located in Washington D.C. or other out-of-state locations. Thus, the primary purpose of these amendments is to adopt by reference current federal regulations governing gas safety along with updating certain other technical standards contained in the rules. The MPSC also proposes to add record retention periods. The proposed amendments also make minor changes to Michigan rules so that the language in these rules conforms more closely to the federal rules.

5. Cite the specific rule promulgation authority (i.e. agency director, commission, board, etc., listing all applicable statutory references. If the rule(s) are mandated by any applicable constitutional or statutory provision, please explain.

49 USC 60105(b)(2) provides that the state retains jurisdiction over gas pipeline facilities and transportation as long as the state certifies that it has adopted each applicable federal standard, or is taking steps to adopt that standard.

MCL 483.152 provides that the MPSC shall promulgate rules and prescribe safety standards for gas pipeline facilities and transportation.

6. Describe the extent to which the rule(s) conflict with, duplicate, or exceed similar regulations, compliance requirements, or other standards adopted at the state, regional, or federal level. Include applicable public act and statutory references.

These rules adopt by reference a more current version of the federal standards contained in 49 CFR part 192, “Transportation of Natural and Other Gas by Pipeline: Minimum Federal Safety Standards,” as well as more recent versions of 49 CFR parts 40, 191 and 199.

7. Is the subject matter of the rule(s) currently contained in any guideline, manual, handbook, instructional bulletin, form with instructions, or operational memo?
